And I could do with a copy of the firestorm viewer that they were maintaining for older OSX releases to test a few things
without all the bells and whistles of the more modern viewers.

I did try looking on the firestorm website but I could find anything but I do remember it being mentioned in the last year as still
being available for download.. Second Life may not run on graphics cards other than the ones listed above The following cards
are NOT compatible with Second Life: NVIDIA cards that report as a RIVA TNT or TNT2; ATI cards that report as RAGE,
RAGE PRO, or RADEON 320M, 340M, 345M, or similar. [Hawayein Song Download](#)
